

Flatwall Headwall System

Flatwall Headwall System

The Flatwall headwall system, from Hill-Rom, is the solution to streamlined patient care.

The typical clutter surrounding the headwall area, such as medical gases, electricals and communications are consolidated within the Flatwall system in an attractive and functional way. And, the system may be configured in ways you haven't imagined.

Its attractive, uncluttered appearance gives you the option to address unique requirements of individual units. With a full line of accessories, the system can easily adapt to specific health care needs throughout the hospital.

The Flatwall system may be used for new installation, room upgrades or renovation projects. The system is delivered pre-piped and pre-wired for simple installation. When it comes to maintenance, the interior is easily accessible by sliding out the front panels.

Surprised by its flexibility? Talk to us about the possibilities that exist with the Flatwall headwall system.
